

ARTALO

SmartScreen  
+ Apple TV

---

**Operating Instructions**

# SmartScreen + Apple TV

---

## TECHNICAL CHARACTERISTICS

---

- Stream your favorite movies, TV shows, and music directly to the 10" SmartScreen display in the Artalo mirror with Apple TV support. Activating your Apple TV device is easy and only takes a few minutes using your iPhone or iPad. You can then conveniently control the screen with the included Siri Remote, allowing you to easily launch apps such as Netflix, Apple TV+, HBO Max, YouTube, or Spotify. A wide range of other apps is also available for download from the Apple App Store. Thanks to integration with Apple HomeKit, you can easily connect the mirror to your smart home and control it via Siri directly from your iPhone or Apple Watch. The mirror also features a built-in Bluetooth speaker and offers the option to connect external speakers for an even better experience. The SmartScreen area of the mirror is completely transparent, ensuring a clear and distortion-free image. Smart devices require a constant power supply. So if you choose to connect the mirror directly to electricity, you must ensure a continuous power source for the mirror.

---

## WIRING INSTRUCTIONS

---

1. Turn on the device using the included remote control. Once powered on, the Apple TV home screen will appear.
2. Select your language and connect to a Wi-Fi network.
3. Follow the on-screen instructions.
4. Sign in with your Apple ID. You can also use your iPhone or iPad for quick login – the device will prompt you automatically.
5. Complete the basic Apple TV setup. Choose a device name, activate features like Siri, security, location, etc.

6. If you use the same Apple ID as on your iPhone, Apple TV will automatically connect to the Home app.

---
