Mirror Sticker

---

User Manual / Assembly Instructions

# How to Properly Apply a Mirror Sticker?

## **1. Clean the mirror**

The surface must be clean, dry, and free of grease. Ideally, use a damp cloth or an eco-friendly cleaner that is gentle on the surface and free of chemicals.

## **2. Check the sticker**

Unroll the sticker and make sure it is complete. Do not remove the transfer film – it is used for easy application of the design onto the mirror.

## **3. Position the sticker without sticking it**

Place it on the mirror and consider the ideal position.

## **4. Applying and smoothing**

Start applying from the top down. Using a plastic squeegee, press the sticker through the transfer film – always from the center towards the edges to push out any air bubbles.

## **5. Remove the transfer film**

Once the sticker is firmly pressed, slowly remove the transfer film at an angle. If any part of the design lifts, place the film back and press again.

## **6. Let the sticker rest**

After application, leave the sticker untouched for 12–24 hours to allow it to adhere properly.

# Parameters

Finish:	moisture-resistant, also suitable for bathrooms
Adhesive:	permanent – adheres well to smooth surfaces (e.g., glass, mirror)
Transfer film:	yes
Use:	only on smooth, degreased, and flat surfaces
Dimensions:	listed in the product description
Application method:	manual application, use of a plastic squeegee recommended
Removability:	The sticker can later be removed without damaging the mirror (not intended for reuse)

Thank you for  
choosing  
our product.
